OBJECTIVE

Python Developer and AI/ML Enthusiast with experience in Full Stack Development, Generative AI, RAG (Retrieval-Augmented Generation), and scalable web applications. Skilled in building AI-powered chatbots, automation systems, REST APIs, and real-time applications using Python, JavaScript, Node.js, and MongoDB. Experienced in LLM integration, prompt engineering, AI cost optimization, and deploying production-ready solutions. Passionate about leveraging AI to solve real-world problems and build intelligent products.

TECHNICAL SKILLS

- Programming: JavaScript, C++, Java, Python, Rust
- Full Stack Development: HTML5, CSS3, React.js, Next.js, SQL, JQuery.js, Node.js, Express.js, REST APIs, MVC Architecture, API Integration, WebSockets, JWT Authentication, Django
- Core Concepts: Data Structures & Algorithms, OOP, DBMS, SDLC, STLC, Agile Development
- Tools: Git, GitHub, Power BI, Postman, Figma | Automation & AI/ML Systems

PROJECTS

Freelance Project | *Live Demo* **June 2024 – July 2024**
Kailash Stationery Inventory Management System *JavaScript, Node.js, Express.js, Chart.js, D3.js*

- Developed a full-stack inventory management system for a retail client, automating stock tracking, product management, and purchase workflows.
- Improved operational efficiency by 30% through real-time inventory updates, scalable database architecture, and optimized backend APIs.
- Integrated analytics dashboards and ML-based demand forecasting to predict sales trends and automate restocking decisions for business growth.

Upside Down Coding Competition Platform | Live Demo **January 2025 – January 2025**
B.K. Birla College *TypeScript, Socket.IO, Tailwind CSS, CodeMirror, Judge0.js*

- Developed a full-stack coding competition platform with multi-level contests, automated evaluation system, and secure admin dashboard for real-time contest management.
- Implemented live leaderboard updates and real-time participant monitoring using Socket.IO, supporting 20+ concurrent users during coding competitions.
- Built scalable backend APIs and anti-cheat monitoring features with JWT authentication, violation tracking, and automated level progression.

Faculty Evaluation System | Live Demo **November 2024 – January 2025**
B.K. Birla College *HTML5, CSS3, JavaScript, Node.js, Express.js, MongoDB, REST APIs, PDFKit*

- Developed a full-stack faculty evaluation and appraisal system for B.K. Birla College to automate evaluation workflows, report generation, and secure document management.
- Implemented role-based access control, analytics dashboards, PDF/Excel report generation, and centralized evaluation tracking for admins, faculty, and students.
- Performed API testing using Postman and validated application workflows to ensure data accuracy and system reliability.

EXPERIENCE

Software Developer Intern | Qualyval Pvt. Ltd. | Remote
Rust, Git, Web Automation, Debugging, Testing | January 2026

- Developed automation solutions and web scripts to streamline workflows and reduce manual effort.
- Performed debugging, validation, and testing of software components to ensure reliability and performance.
- Collaborated using Git-based version control and participated in defect identification and resolution.

EDUCATION

- **B.K. Birla College of Arts, Science and Commerce** **(August 2023 - April 2026)**
  Bachelor of Science in Information Technology (CGPA: 9.80/10)

CERTIFICATIONS & ACHIEVEMENTS

- Achieved 2nd place in a Front-End Designing Competition, secured 175th rank among 1000+ participants in a national aptitude competition, earned Runner-up position in WebDevIcon, and actively participated in 5+ hackathons.
- Career Essentials in Generative AI (Microsoft & LinkedIn Learning), Artificial Intelligence for Business, Ethics in AI, What Is Generative AI? (LinkedIn Learning), Full Stack Web Development with AI Tools (Edunet Foundation).
